

Could your school use \$100,000?

Math 101

\$45,000 average teacher salary per year

÷

36 weeks in the school year

÷

40 hours per week

\$31 average hourly wage

30 minutes of non-productive time per day

x

5 school days per week

x

36 school weeks

÷

60 minutes per hour

90 lost hours per year

\$31 per hour x 90 lost hours =

\$2,800 spent *per year, per faculty and/or staff member*
looking for "stuff"

How many teachers and staff do you have? **35?**

That equates to a *lost* productivity cost of **\$98,000** per year.

The Problem: Lost Time

Recent studies indicate that a professional worker in the United States invests more than **30 minutes** each day looking for information or materials in or around their desk, office and/or in files.

Teachers who cannot find what they need in their classrooms are losing precious teaching moments.

Imagine what your faculty and staff could do with that extra productivity time:

Create enrichment activities to build morale?
Tutor more students?
Raise test scores?

Get organized. Save time. Get more done.™

Recapture Time & Funding

A T.E.A.C.H. Approach™ workshop will provide your faculty and staff with the skills they need to make critical decisions that affect their time, space and paper management – all of which affect their students.

Attendees will learn:

- ◇Crucial decluttering, organizing and productivity strategies
- ◇Critical decision-making skills
- ◇Five key factors in managing the school day
